SUMMARY

Passionate about Video Games, User Interfaces and Technology, mid level Programmer looking for a new challenge!

WORK EXPERIENCE

DigixArt Entertainment - Game, UI & Tools Programmer June 2023 - present

- Gameplay: Developed multiple key gameplay systems such as Stealth & Chase, Carry, and initiated development on the game's unique selling point, the Asynchronous Gameplay system.
- UI: Owned end-to-end UI development as the main programmer, working in close collaboration with Art and Design teams to deliver a final product that faithfully reflects the artistic vision.
- Tools: Built custom in-engine tools to accelerate development and debugging, including a JIRA bug reporting system and an NPC teleport tool.

Les Tontons Truqueurs - Pipeline TD Intern June 2022 - September 2022

- Refresh: Migrated 40% of legacy scripts from Python 2 to Python 3, improving maintainability and modernizing the codebase.
- Automation: Implemented automated file generation on a per-clip basis, improving pipeline efficiency by 150%.
- Integration: Built Python integrations within Unreal Engine to automate communication with proprietary studio tools, streamlining pipeline workflows.

Sumerge Software Solutions September 2018 - July 2021

- Adaptability: Delivered multiple modules across different tech stacks (C#/.Net, Java, Spring Boot).
- Leadership: Lead a team of four developers, actively coordinating planning and assigning tasks to ensure efficient delivery.
- Setting Standards: Performed code reviews and established guidelines to support ongoing, iterative code review processes.
